

PROTEC
your world with colour

COMPANY PROFILE

YOU'RE IN GOOD COMPANY WITH PROTEC

Since 1978, Protec has continued its commitment to product testing and development through research and technology. Our dedication to ongoing product development is your guarantee that with Protec, you will receive the highest quality paints and finishes every time.

The consistent quality of our products and the service we provide, has formed the foundation for our success and is supported by an ever growing, loyal client base, that has helped Protec develop into one of Australia's leading paint manufacturers.

Protec is a proudly independent Australian owned company. Our reputation for producing technically superior coatings for the marine, automotive, industrial, building and construction industries continues to grow.

Protec is proud of its strong growth in Australia. Our aim is to continue to build our domestic market share and expand our already substantial export sales. There is an ever-increasing demand for our products in China, India, South Africa and the Pacific and Asian regions.

Our state of the art manufacturing and laboratory facilities based in Adelaide, combined with our sales and network distribution centres located throughout Australia and New Zealand, guarantee a level of service and technical expertise that is second to none.

At Protec, our aim is always to be at the forefront of significantly advanced coating products.

RESEARCH & DEVELOPMENT

Protec's dedicated commitment to ongoing research and product development is just one of our many strengths. Our fully equipped, independent and professionally staffed laboratories and research facilities continue to meet our customers' individual needs for new and highly innovative products, at very competitive prices.

Our superior technology is based on the latest advances in both local and international information and developments. Protec's ongoing testing and research ensures that only premium quality raw materials from around the world are used in our innovative product formulations.

Combine this with the best practice manufacturing techniques available, the confidence of our life-time warranty and the extensive range of Protec industrial, automotive and domestic paints and finishes and you'll always finish a step ahead of the rest with Protec products.

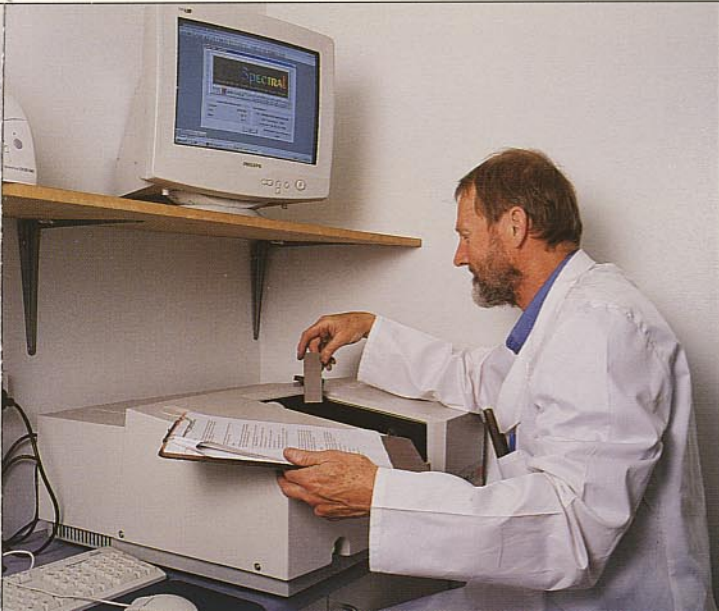

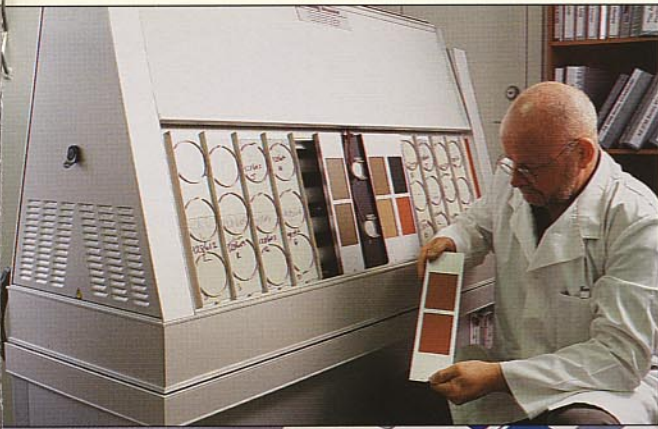

QUALITY ASSURANCE

We believe the manufacture of quality coatings is dependent on strict quality control - one of Protec's great strengths. Continual testing and upgrading of our formulae and ingredients ensure that all products conform to the highest possible standards. This guarantees that our customers receive the best quality finishes when they choose Protec products.

At Protec, we base our formulae, ingredients and strict quality control in the manufacturing process to the highest international standards. Protec is Quality Assured to AS/NZS ISO 9001.

But it doesn't end here, we are seeking new techniques, better ingredients and upgrades to constantly improve all facets of our business to provide the best products and service to our customers ...now and into the future.

PROTEC

SALES & MARKETING

Protec's highly trained sales consultants are always available to advise customers on all aspects of Protec paints and finishes. If you need technical advice or you want to discuss a special finish for a project, call your nearest Protec branch and a consultant will make a time to come and see you.

Our team is committed to customer service and the Protec product range.

Their work ethic is based on three principles:

- Performance to schedule - Commitment to quality - Competitive prices.

Our technical service laboratory is available for customer training and is also used for consultant training programs to ensure that our team is constantly up to date with the latest technology.

The Protec product range is marketed directly to customers via Protec's sales force and our extensive distributor network.

Please call us for technical advice if you are facing a finishing problem, or to discuss your general requirements ... Only Protec people know Protec best.
